Current Transformers (Fault Recording)

Product Overview

YuanXing Electronics has Current Transformers (CTs) for manufacturers that record faults. These CTs serve as the relay protection current transformer for recording faults with extremely accurate transient responses ($T_p = 100\text{ ms}$). The protective current transformers also have UL 94-V0 PBT/ABS housings, 2500 V of isolation, and 5000 V of surge capacity. They are compliant with IEC 61869-2 Class 0.5 / 1.0 and provide selectable voltage/current outputs without requiring any external power supply. The CT can be used in an operating frequency range from 50 Hz to 2000 Hz and at ambient temperatures between -25°C and $+55^\circ\text{C}$. This makes the protective CTs designed for relay use incredibly reliable in most applications of industrial power systems.
